Färöer / Faroe Islands

Digitale Landkarten von GfK GeoMarketing

Die Landkartenedition Färöer gehört zu einem der umfangreichsten Landkartenarchive mit der weltweit größten Sammlung an digitalen postalischen und administrativen Landkarten. Es bietet Karten für mehr als 240 Länder weltweit, fertig einsatzbereit für GeoMarketing-Softwares, Geografische Informationssysteme (GIS), Internet- und Intranetapplikationen oder Data Warehouse und CRM-Systeme.

Alle Karten werden von Kartographen und Geoinformatikern mit langjähriger Erfahrung in der Kartenproduktion bei uns im Haus manuell digitalisiert. Das hat den Vorteil, dass alle Länder unseren Qualitätskriterien entsprechen, d.h. alle Karten sind lagegenau und geometrisch 100% fehlerfrei, aneinander grenzende Geometrien zeigen weder Überlappungen noch Lücken. Dies gilt nicht nur für die administrativen und postalischen Gebiete, sondern auch für die topografischen Kartenebenen wie z.B. Straßen und Gewässer. Zudem sind die Tabellenspalten der Karten für alle Länder so angelegt, dass beliebig viele Länder direkt zu einer Karte kombiniert werden können.

Die Bezeichnungen der Gebiete sind für viele Länder sowohl in der Landessprache mit den ländertypischen Schriftzeichen als auch in internationaler Schreibweise (ASCII) enthalten.

Digital maps from GfK GeoMarketing

The Faroe Islands map set is part of the world's most comprehensive digital postal and administrative map collection. GfK GeoMarketing provides maps for more than 240 countries, each of them ready for incorporation into geomarketing software applications, geographic information systems (GIS), internet applications, data warehouses and CRM systems.

All maps are manually digitized by cartographers and geoinformatics specialists with many years of experience in map production. The resulting high-quality maps are accurate and geometrically 100% error-free, all adjacent geographic areas are free of both gaps and overlaps. This is true not only of the administrative and postcode areas, but also of the topographic map layers, such as those featuring streets and bodies of water. Additionally, the data columns for all of our maps are optimally arranged, allowing you to combine maps from multiple countries within your active workspace.

For many countries, place-name attributions are provided in both the native language (and script) as well as the international format (ASCII).

Quality features of GfK GeoMarketing's digital maps:

- Gap- and overlap-free digitalization
- Vector-based with infinite zoom capability
- Perfect fit with all worldwide maps provided by GfK GeoMarketing
- Regular updates and additions
- Based on geographic coordinates (WGS84)
- Inclusion of English, international or local attributions
- Cross-checked with the latest satellite imagery
- Perfect fit with GfK GeoMarketing's market and purchasing power data

Explanation of terms

*) Object type:

admin (level 0-5) = This layer depicts the administrative and political boundaries of the country in question. Level "0" corresponds to the country as a whole, with an increasing level of detail for each successive level (e.g., 2, 3 and so on).

postal (1-5 digits) = This layer depicts the postcode divisions of the country in question. "1" refers to one-digit postcodes, "2" to two-digit postcodes, and so on. The higher the number, the more detailed the depiction of the postcode areas.

topogr = This layer depicts topographic features, such as streets, rail networks, waterbodies, elevation levels, forests, areas of occupation, industrial regions, etc.

TA = This layer is based on Tele Atlas cartography.

**) Off. code = This layer contains labels featuring official regional codes – for example, the official designators of postcodes used by the national postal organization.

**) nat. lang. = In addition to ASCII-based labels, this layer contains labels in the language (and associated special characters) of the country in question.
